Research skills are the ability to search for, find collect, analyse, and evaluate information that is relevant to the subject being studied. As a college student, it is important that we can find reliable sources for your class work and assignments. It is also essential that you know how to correctly use and handle the sources when you make them part of your own work.

Outside of school, most of us also feel that it is important to be informed about current issues and ideas. Knowing what is going on in the world is a citizen's responsibility. Plus, it feels good to join in a conversation and know the facts, or to be sure we are sharing a meme, social media post, or news article that's accurate and trustworthy.

Note-taking is the practice of writing down or otherwise recording key points of information. It's an important part of the research process. Notes taken on class lectures or discussions may serve as study aids, while notes taken during an interview may provide material for an essay, article, or book. Writing notes engages your brain in specific and beneficial ways that help to retain information. Taking notes involves active listening, as well as connecting and relating information to ideas you already know. It also involves seeking answers to questions that arise from the material.

How I research and finding information for my report coursework

- Taking advantage of library resources
- Verify information from several resources
- Learn how to recognize a quality source

Some methods for note taking are:

- Gather note-taking materials.
- Outline the main topics.
- Outline the subtopics.
- Insert supporting thoughts and facts.
- Add further details and examples.
- Review and recite your notes.

There are many Note taking ways some are Outline method, Cornell method, Mind map method, Flow Method, write on the slide method these are some notes taking. From these I like Mind map and Cornell Method. Mind map has taught us in our tutorial class which it is easier to find detail information what is written in the notes. In Cornell Method there are three type character, Cue and Summery. Recently, I have done Mind map Method it is easy for the note taking. It focuses on key ideas written down in our own words and looking for connection between them. We can map knowledge in a way that will help us to better understand and retain information
